

CASKET HAVING MEMORABILIA COMPARTMENT

Abstract of the Disclosure

A casket memorabilia compartment assembly adapted to couple to a casket to provide display and/or storage of pictures memorializing the deceased.

- 5 The memorabilia compartment assembly comprises a panel mountable to the casket for swinging displacement between an inner hanging position within the casket and an outer hanging without the casket. The panel includes a display side exposed when in the outer hanging position. The display side includes a compartment for the display and/or storage of pictures. The outer surface of the compartment is
- 10 transparent so as to view the pictures within the compartment. The memorabilia compartment assembly can be incorporated into a big body and/or throw used during viewing of the deceased.
